

- Comprehensive back office
- Smaller number of users (up to 10 named)
- Full integration with all business functions
- Covers all major back office functions

Answer Retail SBE is suitable for companies with a smaller number of users (up to 10 named) but needing a comprehensive back office system that will integrate with all business functions.

All major back office functions are covered, from stock control, branch stock transfer, file maintenance and price management, to management reporting, financials, sales order processing and purchasing.

Total visibility of all Branch/Shop stock is maintained.

Modules Available:

Retail Management

This module provides the linkages required to allow the Branch/Retail Point to communicate with the Back Office and vice versa.

Distribution

Designed for fast moving environments and totally integrated, our Distribution modules can help your business achieve considerable savings, vital in today's competitive marketplace.

Includes Inventory Management, Purchasing, Sales Order Processing

Finance

Our financial modules will give you a strong, reliable foundation when you need to account for every penny, in every currency, in every country.

Control all aspects of the business with the minimum of effort.

Includes Cash Book, General Ledger, Payables and Receivables.

Systems Administration

This is the foundation module that underpins and supports all other modules.

It is split into Application Support and System Administration.

Includes Email and Systems Admin.
