

A powerful tool for mobile data processing

- ▶ Flexible and powerful
- ▶ Mobile data processing
- ▶ Integrated into Inventory Management, Purchasing, Sales and Work Order/Schedule processing
- ▶ Utilise bar coding
- ▶ Remote data capture

A flexible, complementary tool for mobile data processing. Answer Hand Held provides extensions for Inventory Management transaction processing.

Integrated to Inventory Management and Purchasing, Sales and Work Order/Schedule processing.

With Answer Hand Held you can take full advantage of bar coding, remote data capture and the freedom to process data on the move.

Technical details

Answer Hand Held programs are designed to run on devices capable of emulating VT220 terminal adapters in a UNIX character mode environment.

Programs run on screens 20 characters wide by 16 characters long.

Answer Hand Held programs take advantage of barcode scanning technology and are capable of reading single barcodes that contain more than one item of information. Barcodes are configurable and users can implement their own barcode designs.
